The Chicago Cubs-Rich Cohen 2017-10-03 A captivating blend of reportage and memoir exploring the history of the Chicago Cubs When Rich Cohen was eight years old, his father took him to see a Cubs game. On the way out of the park, his father asked him to make a promise. "Promise me you will never be a Cubs fan. The Cubs do not win," he explained, "and because of that, a Cubs fan will have a diminished life determined by low expectations. That team will screw up your life." As a result, Cohen became not just a Cubs fan but one of the biggest Cubs fans in the world. In this book, he captures the story of the team, its players and crazy days. Billy Sunday and Ernie Banks, Three Finger Brown and Ryne Sandberg, Bill Buckner, the Bartman Ball, Kris Bryant, Anthony Rizzo—the early dominance followed by a 107 year trek across the wilderness. It's all here—not just what happened, but what it felt like and what it meant. He searches for the cause of the famous curse. Was it the billy goat, kicked out of Wrigley Field in Game 5 of the 1945 World Series, or does it go back further, to the very origins of the franchise? Driven mad with futility, he went on the road with the team in search of answers, interviewed great players present and past, researched in libraries but also in the bleachers, double-fisted, a frosty malt in each hand, demanding answers. He came to see the curse as a burden but also as a blessing. Cubs fans are unique, emissaries from a higher realm, warning of hubris and vanity. The blue cap with the red C said, "My Kingdom is not of this world." He interviewed the architects of the 2016 Cubs, the team that broke the curse. Here's what he asked: How the hell did you do it? He was at (almost) every game of the 2016 playoff run—a run that culminated in (maybe) the single greatest baseball game ever played. He was excited but also terrified. Losing is easy. What would it mean to win? Wearing a Yankees hat meant corporate excellence. Wearing a Mets hat meant miracles. But wearing a Cubs hat meant loving the game on its most humdrum afternoon—September 13, 1979, say, 14 games out of first place, Larry Bittner driving in Ivan DeJesus. Would we lose that? Would being a Cubs become ordinary? A mix of memoir, reporting, history and baseball theology, this book, forty years in the making, has never been written because it never could be—only with the 2016 World Series can the true arc of the story finally be understood.

Beyond Bartman, Curses, & Goats: 104 Reasons Why It's Been 104 Years-Chris Neitzel 2013-04-01 The Chicago Cubs are NOT cursed! A barnyard animal has nothing to do with the team's continued futility. There are rational and logical reasons why the Cubs have the longest championship drought of any professional sports franchise. "Beyond Bartman, Curses, & Goats" will take you through 104 of them...to match the 104 years it has been since the last Cubs' World Series title in 1908. For example: Many Cubs' near misses such as the entire decade of the 1930s, 1945, 1969, 1984, and yes...2003. (sigh) Years and years of poor drafting...consistently missing out on Hall of Famers and All-Stars that could have been Cubs. The uncanny successes of Cubs' players...after the Cubs traded them. Poor financial decisions that had catastrophic effects on long-term success. Historical blunders, such as having one of your young "ace" pitchers throw 141 pitches in a game...in April! If you love the Cubs, you will enjoy this analytical look at 104 years of the team's history...and you will gain a vast knowledge of why this team continues to fail.

Cold Mountain-Charles Frazier 2007-12-01 In 1997, Charles Frazier's debut novel Cold Mountain made publishing history when it sailed to the top of The New York Times best-seller list for sixty-one weeks, won numerous literary awards, including the National Book Award, and went on to sell over three million copies. Now, the beloved American epic returns, reissued by Grove Press to coincide with the publication of Frazier's eagerly-anticipated second novel, Thirteen Moons. Sorely wounded and fatally disillusioned in the fighting at Petersburg, a Confederate soldier named Inman decides to walk back to his home in the Blue Ridge mountains to Ada, the woman he loves. His trek across the disintegrating South brings him into intimate and sometimes lethal converse with slaves and marauders, bounty hunters and witches, both helpful and malign. At the same time, the intrepid Ada is trying to revive her father's derelict farm and learning to survive in a world where the old certainties have been swept away. As it interweaves their stories, Cold Mountain asserts itself as an authentic odyssey, hugely powerful, majestically lovely, and keenly moving.

Field Marshal Tamas' coup against his king sent corrupt aristocrats to the guillotine and brought bread to the starving. It's up to a few... Stretched to his limit, Tamas is relying heavily on his few remaining powder mages, including the embittered Taniel, a brilliant marksman who also happens to be his estranged son, and Adamat, a retired police inspector whose loyalty is being tested by blackmail. But when gods are involved... Now, as attacks batter them from within and without, the credulous are whispering about omens of death and destruction. Just old peasant legends about the gods waking to walk the earth. No modern educated man believes that sort of thing. But they should... In a rich, distinctive world that mixes magic with technology, who could stand against mages that control gunpowder and bullets? PROMISE OF BLOOD is the start of a new epic fantasy series from Brian McClellan. Winner of the David Gemmell Morningstar Award for Best Debut Fantasy.

Planet Funny-Ken Jennings 2019-07-09 A Kirkus Reviews Best Book of the Year The witty and exuberant New York Times bestselling author Ken Jennings relays the history of humor in "lively, insightful, and crawling with goofy factlings," (Maria Semple, author of Where'd You Go Bernadette)—from fart jokes on clay Sumerian tablets to the latest Twitter gags and Facebook memes. Where once society's most coveted trait might have been strength or intelligence or honor, today, in a clear sign of evolution sliding off the trails, it is being funny. Yes, funniness. Consider: Super Bowl commercials don't try to sell you anymore; they try to make you laugh. Airline safety tutorials—those terrifying laminated cards about the possibilities of fire, explosion, depressurization, and drowning—have been replaced by joke-filled videos with multimillion-dollar budgets and dance routines. Thanks to social media, we now have a whole Twittersverse of amateur comedians riffing around the world at all hours of the day—and many of them even get popular enough online to go pro and take over TV. In his "smartly structured, soundly argued, and yes—pretty darn funny" (Booklist, starred review) Planet Funny, Ken Jennings explores this brave new comedic world and what it means—or doesn't—to be funny in it now. Tracing the evolution of humor from the caveman days to the bawdy middle-class antics of Chaucer to Monty Python's game-changing silliness to the fast-paced meta-humor of The Simpsons, Jennings explains how we built our humor-saturated modern age, where lots of us get our news from comedy shows and a comic figure can even be elected President of the United States purely on showmanship. "Fascinating, entertaining and—I'm being dead serious here—important" (A.J. Jacobs, author of The Year of Living Biblically), Planet Funny is a full taxonomy of what spawned and defines the modern sense of humor.

Born to Run-Christopher McDougall 2011 Recounts the author's experiences with the reclusive Tarahumara Indians, whose techniques allow them to run long distances with ease, and describes his training for a fifty-mile race with the tribe and a number of ultramarathoners.

The Chicago Tribune Book of the Chicago Cubs-Chicago Tribune 2017-04-11 The history of Chicago's first major league team, packed with photos, stories, and profiles from the archives of their hometown newspaper. The Chicago Tribune Book of the Chicago Cubs is a decade-by-decade look at one of baseball's most beloved (if hard-luck) teams, starting with the franchise's beginnings in 1876 as the Chicago White Stockings and ending with the triumphant 2016 World Series championship. For the first time, this mountain of Cubs history has been mined and curated by the paper's sports department into a single one-of-a-kind volume. Each era in Cubs history includes its own timeline, profiles of key players and coaches, and feature stories that highlight it all, from the heavy hitters to the no-hitters to the one-hit wonders. And of course, you can't talk about the Cubs

without talking about Wrigley Field. In this book, readers will find a complete history of that most sacred of American stadiums, where Hack Wilson batted in 191 runs—still the major-league record—in 1930, where Sammy Sosa earned the moniker “Slammin’ Sammy,” and where fans congregated, even when the team was on the road, throughout its scintillating championship run.

Let’s Pretend This Never Happened-Jenny Lawson 2012-04-17 The #1 New York Times bestselling (mostly true) memoir from the hilarious author of *Furiously Happy*. “Gaspingly funny and wonderfully inappropriate.”—O, The Oprah Magazine When Jenny Lawson was little, all she ever wanted was to fit in. That dream was cut short by her fantastically unbalanced father and a morbidly eccentric childhood. It did, however, open up an opportunity for Lawson to find the humor in the strange shame-spiral that is her life, and we are all the better for it. In the irreverent *Let’s Pretend This Never Happened*, Lawson’s long-suffering husband and sweet daughter help her uncover the surprising discovery that the most terribly human moments—the ones we want to pretend never happened—are the very same moments that make us the people we are today. For every intellectual misfit who thought they were the only ones to think the things that Lawson dares to say out loud, this is a poignant and hysterical look at the dark, disturbing, yet wonderful moments of our lives. A Nice Little Place on the North Side-George Will 2014-03-25 Now with bonus material on the Chicago Cubs’ World Series win, the New York Times–bestselling history of America’s most beloved baseball stadium, Wrigley Field, and the Cubs’ century-long search for World Series glory In *A Nice Little Place on the North Side*, leading columnist George Will returns to baseball with a deeply personal look at his hapless Chicago Cubs and their often beatified home, Wrigley Field, as it enters its second century. Baseball, Will argues, is full of metaphors for life, religion, and happiness, and Wrigley is considered one of its sacred spaces. But what is its true, hyperbole-free history? Winding beautifully like Wrigley’s iconic ivy, Will’s meditation on “The Friendly Confines” examines both the unforgettable stories that forged the field’s legend and the larger-than-life characters—from Wrigley and Ruth to Veeck, Durocher, and Banks—who brought it glory, heartbreak, and scandal. Drawing upon his trademark knowledge and inimitable sense of humor, Will also explores his childhood connections to the team, the Cubs’ future, and what keeps long-suffering fans rooting for the home team after so many years of futility. In the end, *A Nice Little Place on the North Side* is more than just the history of a ballpark. It is the story of Chicago, of baseball, and of America itself.

The Art of Being Human-Michael Wesch 2018-08-07 Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

The 7 Laws of Magical Thinking-Matthew Hutson 2012-04-12 In this witty and perceptive debut, a former editor at *Psychology Today* shows us how magical thinking makes life worth living. Psychologists have documented a litany of cognitive biases- misperceptions of the world-and explained their positive functions. Now, Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time-and it's crucial to our survival. Drawing on evolution, cognitive science, and neuroscience, Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains. It encourages us to think that we actually have free will. It helps make us believe that we have an underlying purpose in the world. It can even protect us from the paralyzing awareness of our own mortality. In other words, magical thinking is a completely irrational way of making our lives make rational sense. With wonderfully entertaining stories, personal reflections, and sharp observations, Hutson reveals our deepest fears and longings. He also assures us that it is no accident his surname contains so many of the same letters as this imprint.

The City Game-Pete Axthelm 2011-06-28 “The master prose stylist portrays parallel basketball worlds in New York City: Madison Square Garden . . . and the playgrounds of Harlem” (*Sports Illustrated*). The New York Knickerbockers, one of the NBA’s charter franchises, played professionally for twenty-four years before winning their first championship in 1970, defeating the Los Angeles Lakers in a thrilling seven-game series. Those Knicks, who won again in 1973, became legends, and captivated a city that has basketball in its blood. But this book is more than a history of the championship Knicks. It is an exploration of what basketball means to New York—not just to the stars who compete nightly in the garden, but to the young men who spend their nights and weekends perfecting their skills on the concrete courts of the city’s parks. Basketball is a city game, and New York is the king of cities.

Wrigley Field-Gregory H. Wolf 2019-04-25 Wrigley Field evokes a feeling of perpetual summer, youth, and dreams. Any mention of the ballpark at the intersection of Clark and Addison in Chicago conjures up images of the ivy on the outfield walls, the hand-operated scoreboard, Cubbie blue, and the park's vibrant neighborhood. Wrigley transcends time and transports its guests to a green oasis in the midst of a bustling city. Built less than 50 years after the Civil War, it was inaugurated when Woodrow Wilson was President of the United States, and a century later it remains a testimony to the enduring power of our national pastime. This book is an ode to that storied ballpark, evoking its history through detailed retellings of 100 games played there, including not only historic triumphs and defeats of the Chicago Cubs (and the Federal League Whales), but also Negro Leagues matchups, youth championships, and even games by the All-American Girls Professional Baseball League. Including the talents of over 50 members of SABR, the book also includes many historic photographs. With articles by Matt Albertson, John Bauer, Nathan Bierma, Thomas J. Brown Jr., Frederick C. The Praetorian STARShip : the untold story of the Combat Talon- 2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

A Man Named Dave-Dave Pelzer 1999-10-01 *A Man Named Dave*, which has sold over 1 million copies, is the gripping conclusion to Dave Pelzer's inspirational and New York Times bestselling trilogy of memoirs that began with *A Child Called "It"* and *The Lost Boy*. "All those years you tried your best to break me, and I'm still here. One day you'll see, I'm going to make something of myself." These words were Dave Pelzer's declaration of independence to his mother, and they represented the ultimate act of self-reliance. Dave's father never intervened as his mother abused him with shocking brutality, denying him food and clothing, torturing him in any way she could imagine. This was the woman who told her son she could kill him any time she wanted to—and nearly did. The more than two million readers of Pelzer's New York Times and international bestselling memoirs *A Child Called "It"* and *The Lost Boy* know that he lived to tell his courageous story. With stunning generosity of spirit, Dave Pelzer invites readers on his journey to discover how he turned shame into pride and rejection into acceptance.

Program Earth-Jennifer Gabrys 2016-04-13 Sensors are everywhere. Small, flexible, economical, and computationally powerful, they operate ubiquitously in environments. They compile massive amounts of data, including information about air, water, and climate. Never before has such a volume of environmental data been

so broadly collected or so widely available. Grappling with the consequences of wiring our world, Program Earth examines how sensor technologies are programming our environments. As Jennifer Gabrys points out, sensors do not merely record information about an environment. Rather, they generate new environments and environmental relations. At the same time, they give a voice to the entities they monitor: to animals, plants, people, and inanimate objects. This book looks at the ways in which sensors converge with environments to map ecological processes, to track the migration of animals, to check pollutants, to facilitate citizen participation, and to program infrastructure. Through discussing particular instances where sensors are deployed for environmental study and citizen engagement across three areas of environmental sensing, from wild sensing to pollution sensing and urban sensing, Program Earth asks how sensor technologies specifically contribute to new environmental conditions.

What are the implications for wiring up environments? How do sensor applications not only program environments, but also program the sorts of citizens and collectives we might become? Program Earth suggests that the sensor-based monitoring of Earth offers the prospect of making new environments not simply as an extension of the human but rather as new “technogeographies” that connect technology, nature, and people.
