This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Winning the Hardware-Software Game Ruth D. Fisher 2009-03-04 “Many books discuss high-tech decision making, but this is the only book I know of that provides a systematic approach based on objective analysis.” —Matthew Scarpino, author of Programming the Cell Processor “This book offers a unique approach to analyzing business strategy that changes the focus and attitude to a lively and fun exercise of treating business strategy as a game.” —Dave Hendricksen, Architect, Thomson-Reuters USE GAME THEORY TO SOLVE THE #1 PROBLEM THAT CAUSES NEW TECHNOLOGIES TO FAIL IN THE MARKETPLACE: LACK OF COORDINATION Too many advanced technologies fail the test of adoption, at immense cost to their creators and investors. Why? Many new technologies are launched into complex ecosystems where hardware, software, and/or connectivity components must work together—for instance, next-generation gaming and video platforms that can only succeed if they offer attractive, compatible content. Often, users aren’t ready to give up existing systems, and content or connectivity providers aren’t ready to move away from existing markets. In either case, the real issue is a lack of coordination.

Fortunately, coordination problems have specific, proven solutions, and Winning the Hardware–Software Game shows you exactly how to find them. Drawing on advanced ideas from game theory, economics, sociology, and business strategy, author Ruth D. Fisher presents a systematic framework for identifying,

assessing, and resolving coordination problems among all the participants in a product ecosystem. Writing in plain, nontechnical, nonmathematical English, Dr. Fisher helps you discover specific steps that will prepare your customers and partners for successful adoption. Using these techniques, you can shape strategy, systematically reduce risk, and dramatically increase profitability. Topics covered in this book include: Discovering the forces that drive or delay adoption by users and content providers Understanding networks, network effects, switching costs, technology compatibility, and other crucial issues Speeding the pace of adoption, and getting to the “tipping point” sooner Clarifying and restructuring the incentives that motivate users and software providers Engineering new systems to maximize the likelihood of adoption Creating expectations of adoption and decreasing the relative value of older systems Learning from Apple Newton versus Palm Pilot, HD DVD versus Blu-Ray, and other significant technology battles Leveraging lock-in, path dependence, standardization, and first-mover advantage With so much at stake, Winning the Hardware–Software Game is a required resource for everyone concerned with new technology adoption—executives, strategists, R&D leaders, marketers, product managers, industry analysts, and investors alike.

Working for the Clampdown Colin Coulter 2019-06-04 This volume brings together a range of writers from different academic disciplines and different locations to provide an engaging and accessible critical exploration of one of the most revered and reviled bands in the history of popular music. The essays collated here locate The Clash in their own explosive cultural moment of punk's year zero and examine how the group speaks from beyond the grave to the uncanny parallels of other moments of social and political crisis. In addition, the collection considers the impact of the band in a range of different geopolitical contexts, with various contributors exploring what the band meant in settings as diverse as Italy, England, Northern Ireland, Australia and the United States. The diverse essays gathered in Working for the clampdown cast a critical light on both the cultural legacy and contemporary resonance of one of the most influential bands ever to have graced a stage.

Aani and the Tree Huggers Jeannine Atkins 2009-07-10 Horrified by the people who have come to cut down their forest homeland, Aani and other women from her village try to make them understand how important the trees are, and a single act of bravery helps save the forest

In Mortal Combat John Toland 2016-05-31 A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of The Rising Sun and Infamy. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In Mortal Combat is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

Greater Cincinnati Religious Peacemakers Various Religious Leaders from Greater Cincinnati 2021-09 Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

Depression Rowena Kong 2019-03-13 Depression is a multi-faceted disorder with symptom clusters that are highly variable between individuals. In spite of efforts utilizing neuroscientific and genetic techniques in research to determine its etiology, practical clinical settings still rely on traditional verbal consultation method to devise treatment for the depressed. This book discusses the importance of focus on causality and the need to discuss issues which lead to depressive symptom manifestation and progress.

The Leadership Moment Michael Useem 1999-06-01 Are you ready for the leadership moment? "Gripping adventure and actionable advice."—Fast Company Merck's Roy Vagelos commits millions of dollars to develop a drug needed only by people who can't afford it • Eugene Kranz struggles to bring the Apollo 13 astronauts home after an explosion rips through their spacecraft • Arlene Blum organizes the first women's ascent of one of the world's most dangerous mountains • Joshua Lawrence Chamberlain leads his tattered troops into a pivotal Civil War battle at Little Round Top • John Gutfreund loses Salomon Brothers when his inattention to a trading scandal almost topples the Wall Street giant • Clifton Wharton restructures a \$50 billion pension system direly out of touch with its customers • Alfredo Cristiani transforms El Salvador's decade-long civil war into a negotiated settlement • Nancy Barry leads Women's World Banking in the fight against Third World poverty • Wagner Dodge faces the decision of a lifetime as a fast-moving forest fire overtakes his firefighting crew.
